I support satellite radio and the right to broadcast traffic and weather specific to a certain city or area. I listen every day, and in fact just drove to Orlando / Disneyworld 2 weeks ago and used the traffic and weather on my XM radio to help me out. An Amber Alert was issued and my radio even displayed the Amber alert and the license number to be watching for. As a paying customer, I do not want these services to go away.  
Sincerely, John Miller
